1 About

The [Skill Portfolio](#)¹ is a web-based tool to create and maintain personal portfolios for tracking skills and knowledge in the downstream space sector. It allows you to annotate education records, work experience, and personal projects with concepts from the SpaceSUITE Body of Knowledge (BoK), enabling a structured and semantically enriched representation of individual competencies complemented by ESCO transversal skills.

The portfolio provides a dedicated management interface with structured forms that guide users through progressively building and refining their profile, supporting continuous growth of personal competencies.

Each portfolio can be exported in multiple formats, including PDF and semantic representations in RDF (Turtle, RDFa and RDF/XML) for interoperability with other systems. Portfolios can also be marked as public and shared via a persistent URL for web-based access and dissemination.

The Skill Portfolio is part of the SpaceSUITE ecosystem of tools and was developed by the [Geospatial Technologies Research Group \(GEOTEC\)](#)² from the Universitat Jaume I, Castelló de la Plana, Spain, in the context of the ERASMUS+ project [SpaceSUITE](#)³.

³<https://www.spacesuite-project.eu/>

2 Anonymous users, login & registration

You must be logged in with a SpaceSUITE account to create, edit, or manage your Skill Portfolio. As an anonymous user, you can only access the public landing page and view portfolios that have been explicitly shared with you via a direct link.

Figure 1 shows the login window used across the SpaceSUITE tools, including the Skill Portfolio. If you already have an account, enter your email (1), your password (2) and click the “Login” button (3). If you forgot your password, type your email (1) and click “Forgot password?” (4) to receive an email with instructions to recover it. If you do not yet have an account, click “Register” (5). You can also sign in with your Google account (6).

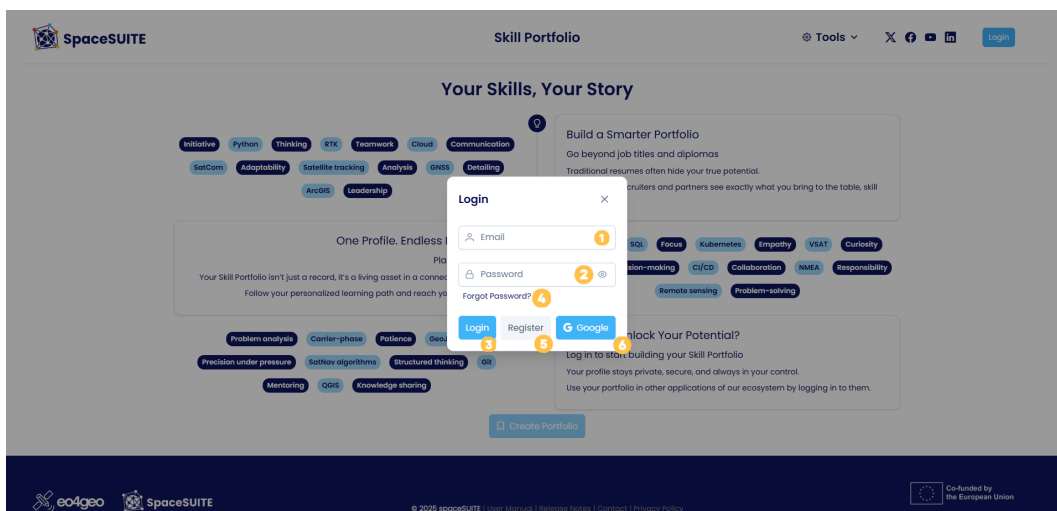

Figure 1: SpaceSUITE Tools login modal.

To create a new account, fill in your email (1), your password (2) and repeat your password (3). The password must contain at least 6 characters. Then click the “Register” button (4) and you will be redirected to the home page of the Skill Portfolio.

When registering, if you see the error ‘The email address is already in use by another account’, it means your email is already registered. Write your email in the login part of the form and click ‘Forgot password?’ to receive a link with instructions to recover it.

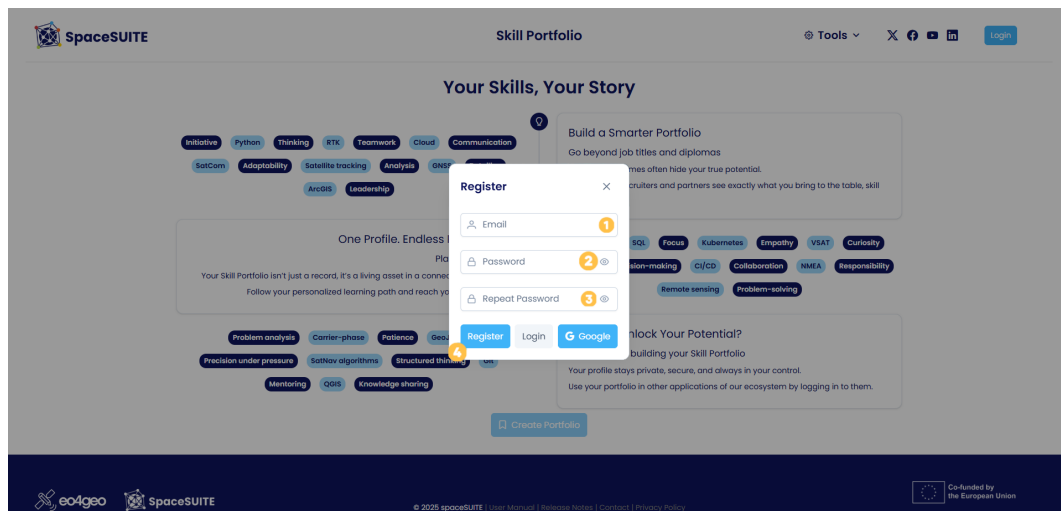

Figure 2: SpaceSUIE Tools register modal.

3 User details and organizations

As can be seen in Figure 3, after logging in you will see an icon with your initial in the navigation bar (1). Clicking on this icon opens a menu where you can choose between the *Profile*, *Organization* and *Logout* options (2).

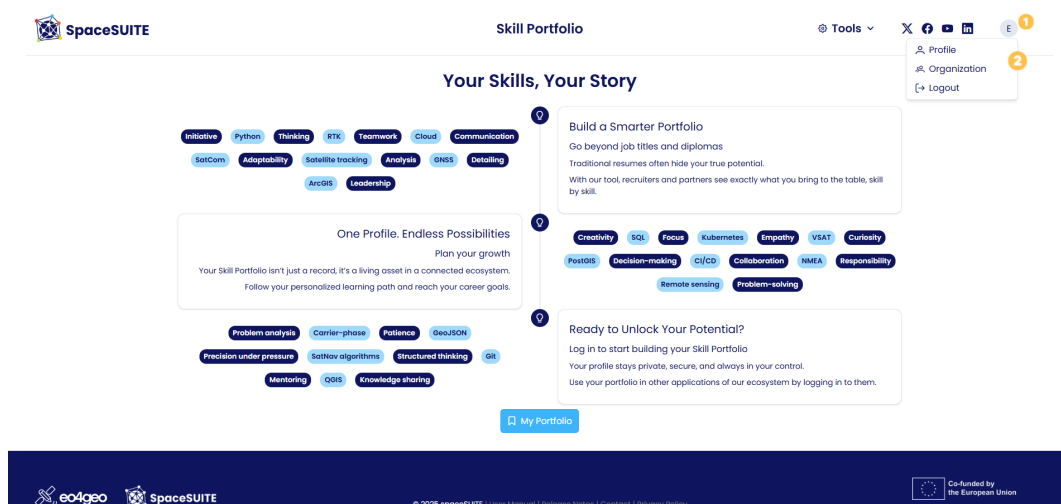

Figure 3: SpaceSUIE Tools navigation bar.

The *User Profile* section (Figure 4) allows you to view and update your personal information. Your email address is displayed in a non-editable field (1), while your name can be modified in the editable field below (2). After making any changes, click the *Update Name* button to

save the updated information (3).

The image shows a 'User Profile' form. It has two input fields: 'Email' with an envelope icon and 'Name' with a person icon. Both fields contain redacted text. Below the 'Name' field is a blue button labeled 'Update Name'. Three orange circular callouts with numbers are present: '1' points to the Email field, '2' points to the Name field, and '3' points to the 'Update Name' button.

Figure 4: SpaceSUITE profile page.

As shown in Figure 5, the *Your Organization(s) Details* section allows you to manage your organizations. You can join an existing organization by selecting it from the dropdown menu (1) and clicking the *Join Organization* button.

Below the dropdown, you see the list of organizations you belong to, with information such as the organization name (2) and description (3). Each organization entry includes buttons to copy the organization email (5) and to leave the organization (6). You can also create a new organization by clicking the *Create New Organization* button at the bottom of the page (7). If you are an administrator of an organization, you will see the *Admin Content* button (4), which opens the administrator panel.

The image shows the 'Your Organization(s) Details' page. At the top, it says 'You are part of 3 organization(s). You can also create your own organization.' Below this is a dropdown menu labeled 'Select an Organization' with a callout '1'. To its right is a blue button 'Join Organization'. Below the dropdown is a list of three organizations: 'Universitat Jaume I' (callout '2'), 'SpaceSuite' (callout '5'), and 'EO4GEO'. Each organization entry has a description, a 'Copy Email' icon (callout '5'), a 'Leave Organization' icon (callout '6'), and an 'Admin Content' button (callout '4'). At the bottom is a button 'Create New Organization' with a plus icon and a callout '7'.

Figure 5: SpaceSUITE organizations page.

In the organization administrator panel (Figure 6), you can manage a specific organization. The left side shows editable fields for the organization name (1), description (2) and contact email (3); click *Update Information* to save any changes (4).

To better structure the content of your organization in the SpaceSUITE tools, you can create *Divisions*. Administrators can add new divisions by entering a name and clicking *Add Division* (5), and remove existing divisions using the delete icon (6). A *Delete Organization* button is available at the bottom for permanent removal of the organization (7).

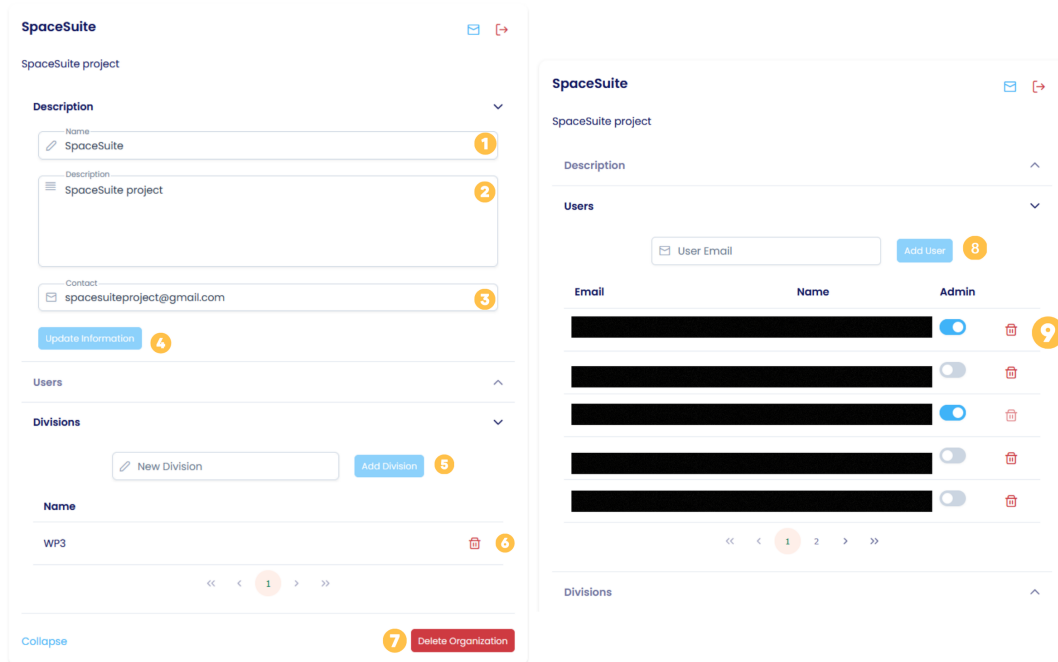

Figure 6: SpaceSUITE organization admin panel.

You can also manage the members of your organization. To add a user, type the email address they use to log in and click the *Add user* button (8). Existing users are listed with their email, name, an admin toggle and a delete icon (9), which allows administrators to change a user's role or remove them from the organization.

4 Landing Page

Figure 7 shows the Skill Portfolio landing page, which displays a central timeline surrounded by skill and knowledge tags. The left and right panels feature illustrative cards that explain the page's objective: building a structured portfolio by progressively adding education records, work experience, and projects with semantic annotations for skill tracking and sharing.

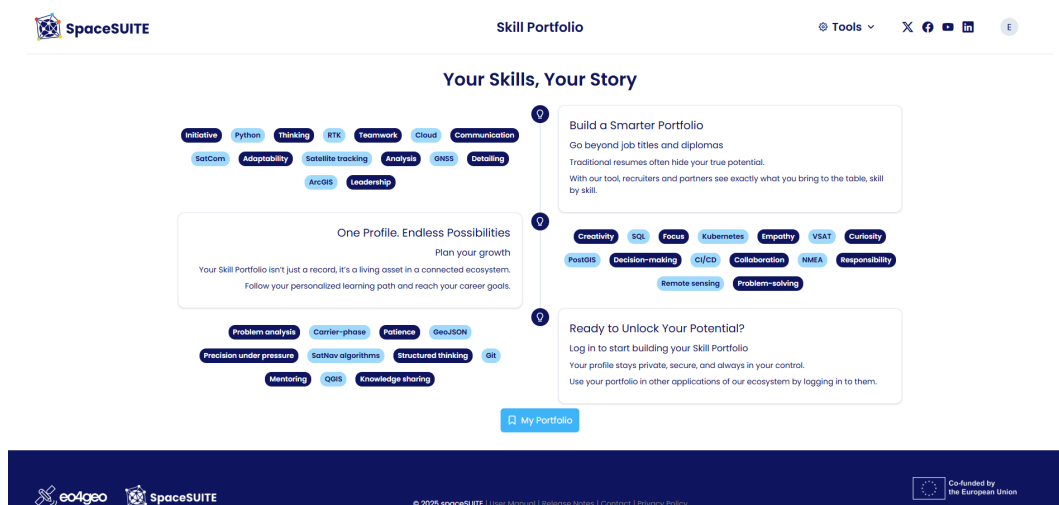

Figure 7: Skill Portfolio Landing Page.

If you are logged in and already have a portfolio, the button displays "My Portfolio" and is active, directing you to the dedicated management view of your personal portfolio. If you are logged in but do not yet have a portfolio, it shows "Create Portfolio" and is active, directing you to the creation form wizard. If you are not logged in, the button displays "Create Portfolio" but is disabled, requiring authentication to proceed.

5 Portfolio Page

Figure 8 illustrates the overall structure of the main portfolio page, accessible via the "My Portfolio" button from the landing page. Key components include (1) the left sidebar dedicated to general user information, (2) the central vertical timeline aggregating all experience, education, and project entries in chronological order, (3) an individual timeline element in its default compact state, and (4) the set of management buttons positioned at the top-right of the timeline section.

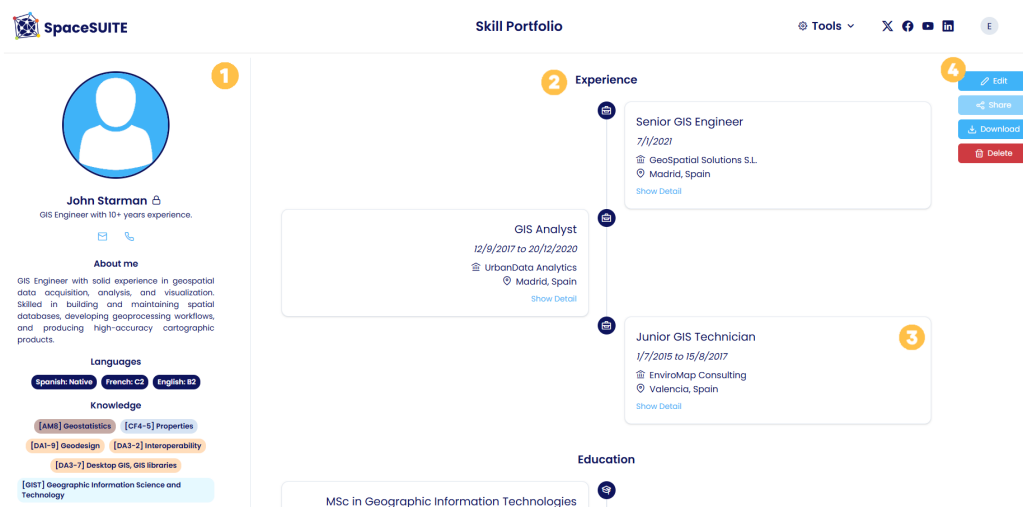

Figure 8: Skill Portfolio Main Page.

The user information sidebar (1) provides a comprehensive profile overview: a circular profile photo at the top, followed by the full name, contact details including phone number and email, a multi-line "About me" section for a professional summary, a list of language skills with proficiency indicators, the Knowledge section displaying colored BoK concept tags alongside any custom knowledge tags, and the Transversal Skills section showing ESCO transversal competencies (e.g., communication, teamwork) with additional custom skills as tags.

Representative timeline elements (3) appear as connected nodes in the vertical flow, each initially presenting only essential details: the entry title (e.g., "Senior Engineer" or "MSc in Geoinformatics"), the start and end dates (or ongoing indicator), the responsible organization (e.g., employer, university), and the location (city/region). Below these basics sits the "Show Detail" link in small blue text, which expands the entry inline without leaving the page.

The top-right action buttons (4) enable full portfolio lifecycle management: the blue Edit button launches the step-by-step creation/editing form pre-filled with current data; Share

generates or copies a persistent public URL (disabled and grayed out if the portfolio visibility is set to private); Download opens a modal popup listing export options (PDF for visual/print use, Turtle/RDFa/RDF/XML for semantic interchange); and the red Delete button prompts a confirmation modal with "Confirm Delete" and "Cancel" options to guard against accidental removal.

[Collapse](#)

Figure 9: Skill Portfolio Timeline Item.

Figure 9 details an expanded timeline element after clicking "Show Detail," which reveals (1) a detailed description textarea content specific to that entry (e.g., responsibilities, achievements), (2) a clickable related URL linking to external evidence (e.g., project site or certificate), (3) the Knowledge tags section with BoK concepts (full codes/names as colored labels) and custom tags relevant to the entry, and (4) the Transversal Skills tags mirroring the sidebar but entry-specific (ESCO skills plus customs). The toggle link now reads "Collapse," reverting the entry to compact view while preserving its expanded state until interacted with.

6 Portfolio Form

A step-by-step wizard form is used to create a new Skill Portfolio or edit an existing one. Access the form via the "Create Portfolio" button on the landing page for new users, or the Edit button on the portfolio page. On first use, a modal prompts users to optionally import data from a Europass CV (Figure 10), which auto-fills general information and entry fields by parsing the CV structure; users can accept, edit, or discard the pre-populated values before proceeding. The interface guides users through structured data entry with validation, ensuring complete and consistent portfolio descriptions across four steps. Required fields are marked with asterisks (*) and validated on submission.

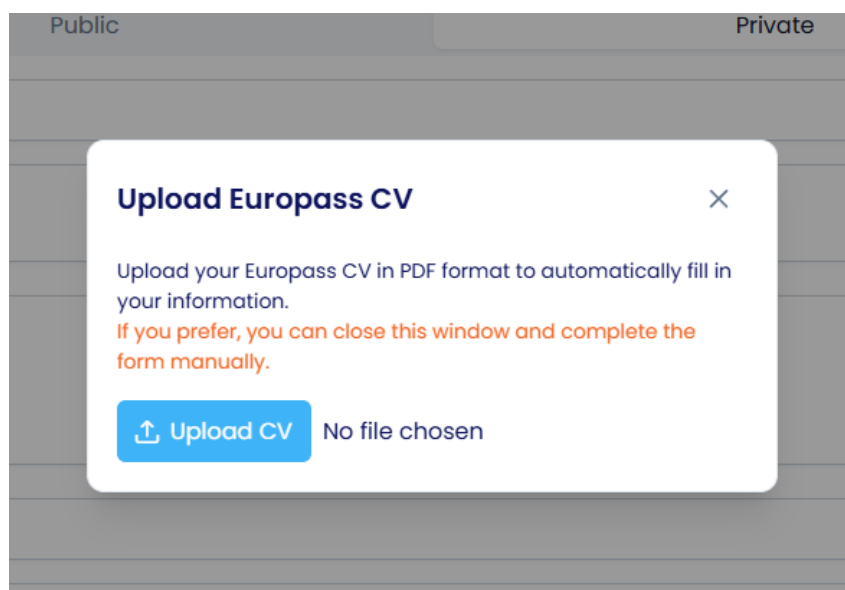

Figure 10: Skill Portfolio Upload Europass CV modal.

6.1 How to fill in fields (input types)

The form combines different input widgets to make data entry faster and more consistent:

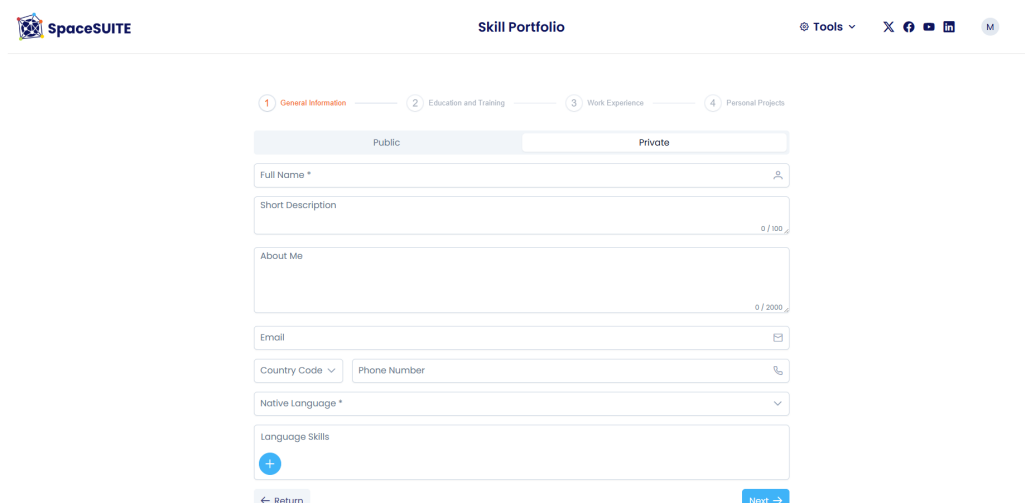

- **Text inputs:** single-line fields for short values (e.g., Title, URL).
- **Dropdown selectors:** choose from predefined values; some dropdowns also allow a custom value to be entered directly in the popover.
- **Multi-select dropdowns:** select multiple values; some dropdowns also allow a custom value to be entered directly in the popover; selected values are displayed as chips.
- **Chip inputs:** type a value and press Enter (or the + button) to add it as a chip; use this for lists such as Creators, Learning Outcomes, Contributors, etc.

- **BoK modal selector:** a dedicated selector to browse/search BoK concepts and add them as Knowledge Annotations.

6.2 Step 1: General Information

This step captures the core identification and profile information for the portfolio sidebar. It includes:

- **Public/Private toggle.** Controls portfolio visibility. Public: discoverable and shareable via persistent URL. Private: restricted to the owner.
- **Full Name** text input. Required. Your display name (up to 100 characters). Keep it professional for headers and sharing.
- **Short Description** textarea, up to 100 characters. A concise professional summary.
- **About Me** textarea, up to 2000 characters. Detailed overview of your background, interests, and goals.
- **Email** text input. Validated email address for contact.
- **Country Code** dropdown selector. International dialing prefix (e.g., +34).
- **Phone Number** number input. Bound to selected country code.
- **Native Language** dropdown selector. Required. Your primary language.
- **Language Skills** chip input. Click + to add rows with Language dropdown and Level dropdown (A1–C2).

The screenshot shows the 'Skill Portfolio' interface in SpaceSUITE. At the top, there's a navigation bar with the SpaceSUITE logo, the title 'Skill Portfolio', and a 'Tools' dropdown menu. Below the navigation bar, there's a progress indicator with four steps: 1. General Information (active), 2. Education and Training, 3. Work Experience, and 4. Personal Projects. The main form area is titled 'General Information' and features a 'Public/Private' toggle. The form includes the following fields: 'Full Name *' (text input), 'Short Description' (textarea, 0/100 characters), 'About Me' (textarea, 0/2000 characters), 'Email' (text input), 'Country Code' (dropdown), 'Phone Number' (text input), 'Native Language *' (dropdown), and 'Language Skills' (chip input with a '+' button). At the bottom of the form, there are 'Return' and 'Next' buttons.

Figure 11: Skill Portfolio General Information Form.

6.3 Step 2-4: Education and Training, Work Experience & Personal Projects

These steps follow an identical structure for the three timeline sections: Education and Training, Work Experience, and Personal Projects. Each starts with a prominent + button to add new item blocks; added blocks are expandable/collapsible for editing or removal, and existing entries from the portfolio are pre-loaded for modification.

1 General Information 2 Education and Training 3 Work Experience 4 Personal Projects

Figure 12: Skill Portfolio Education and Training Form.

Per-item fields within each block include:

- **Title** text input. Required. Name of the experience, degree, or project (e.g., “Senior Engineer”, “MSc Geoinformatics”).
- **Institution** text input. Required. Responsible organization (e.g., university, employer, project lead).
- **Start Date** date input. Required. Beginning of the period.

- **End Date** date input. Optional. End date (leave blank for ongoing).
- **Description** textarea, up to 2000 characters. Detailed responsibilities, achievements, or content.
- **Country** dropdown selector. Geographic location.
- **City** dropdown selector. Activates after Country selection.
- **URL** text input. Validated web address to external evidence (e.g., certificate, project page).
- **Transversal Skills** multi-select dropdown. Tree-structured selection of ESCO transversal skills, displayed as chips; supports custom entries.
- **Knowledge** BoK modal selector. Browse/search GeoSpace BoK concepts (guideline: 2-6 per item) and add as chips.
- **Custom Knowledge** chip input. Type domain concepts not in BoK and press Enter or click + button to add.

A Glossary of Terms

BoK: Body of Knowledge. The complete set of concepts and relations between them that make up the GeoSpace domain (Earth Observation, GNSS, Satellite Communications, Satellite Systems), including related learning outcomes as defined by the SpaceSUITE project.

BoK tags: Colored labels representing knowledge areas and specific concepts from the GeoSpace BoK associated with portfolio entries (education, experience, projects). Tags adapt their display based on available space (full name, code only, or truncated).

ESCO transversal skills: Cross-sectoral competencies from the European Skills, Competences, Qualifications and Occupations (ESCO) framework, used to complement domain-specific BoK annotations with general skills such as communication, teamwork, or problem-solving.

EQF level: European Qualifications Framework level indicating the qualification levels evidenced by portfolio entries (levels 1-8, from basic to doctorate).

RDF: Resource Description Framework. A standard format for structured metadata exports (Turtle, RDFa, RDF/XML) that enables machine-readable descriptions of the skill portfolio and interoperability with other systems.

Skill Portfolio: A personal, semantically enriched collection of annotated education records, work experience, and projects, linking domain knowledge from the GeoSpace BoK with ESCO transversal skills for competency tracking and sharing.
